ABSTRACTED-PUB-NO: JP 2002322025 A

BASIC-ABSTRACT:

NOVELTY - A skin activating aroma plant vinegar obtained by adding extract of raw material having natural aroma to plant vinegar produced by carbonization process, is new.

DESCRIPTION - An INDEPENDENT CLAIM is included for a method for manufacturing skin activating aroma plant vinegar, comprising pickling raw material having natural aroma with plant vinegar and allowing the extract containing aroma component to ooze out. The extract is then uniformly mixed with plant vinegar.

None given.

USE - As skin activating agent such as bathing agent, coating agent, etc. for preventing athlete's foot, acne, pimple, rough-skin, miliaria and crotch offset.

ADVANTAGE - The skin activating agent is safe, does not cause irritation to the skin, has excellent moisturizing effect, can be easily prepared and the product is cost-effective.

ABSTRACTED-PUB-NO: JP 2002322025 A

EQUIVALENT-ABSTRACTS:

BIOLOGY

Preferred Components: The plant vinegar is wood vinegar or bamboo acid liquid. The raw material having natural aroma is the sarcocarp of aromatic fruits, flowers and leaves, aromatic trees such as Japanese cypress, Cinnamomum camphora, Lindera umbellata, Thujopsis dolabrata Japanese cedar and sandal wood, rose, herb, tea leaf, mandarin orange, apple, persimmon, lemon, ginger, turmeric and the powder of sarcocarp.

To 80 L of plant vinegar 20 kg of raw material having natural aroma such as wooden part of Japanese cypress was added. The mixture was allowed to pickle for 3 months. As the mixture pickles, a membrane of fat and oil was formed on the surface of the wood vinegar. The mixture was filtered and purified to obtain the bathing agent.
